Look at these four extracts from a computing textbook. Which criteria is the writer using to classify the networks he's describing?

1. **The most common examples of networks are LANs, PANs, MANs and WANs.**

   _____

2. **There are several languages that the computers on a network can use to communicate with each other. For example, the Internet uses TCP/IP.**

   _____

3. **A client-server network differs from a peer-to-peer network in several ways, the most important being that on a peer-to-peer network there is no need for a separate computer to act as a server.**

   _____

4. **The most common layouts for networks are bus, star and ring.**

   _____

English	German
local Area Network LAN	lokales Netz
Wide Area Network WAN	Weitverkehrsnetz
Global Area Network GAN	globales Netz
to cover	abdecken
node	Knoten
range	Reichweite
Peripheral	Peripheriegerät
to connect	verbinden mit
for example	zum Beispiel
phone cord	Telefonkabel
phone jack	Telefonanschluss
Protocol	Protokoll
connectivity	Verbindungsstatus
topology	Topologie, Aufbau
Infinite Loop	Endlosschleife
Setup	einrichten
to put in data	(Daten) eingeben
to type in	eintippen
to log in/out	sich anmelden, abmelden
sensitive data	vertrauliche Daten
equipped with	ausgestattet sein
reliable	ausfallsicher
to roam	durchstreifen
access point	Zugangspunkt
subject to interference	Störungsanfällig
Fibre(optic) cable	Glasfaserkabel
file sharing	Datei austausch
to consist of	bestehen aus
dial up/in; Register	sich einschreiben für (sich anmelden)
execute	ausführen
Satellite dish	Satellitenschüssel
